

Analogue  
clickclock™

# About Us

We bring a fresh approach to design incorporating modern technology into everyday objects. Sometimes life can be complicated and technology too intrusive. Therefore by keeping our product lines simple yet engaging and keeping our products up to date with technology, as well as being aesthetically pleasing has kept us driven, and the reason why our products have been so popular and successful around the world.

We thrive on seeking and creating the out of the ordinary, which enforces the foundation of our ethos, escape the boring: design for a smarter life.

Paul Sun

Gingko Electronics Ltd (UK)

# Analogue clickclock™

Inspired from the nature of simplicity and the look of a traditional analogue clock face, the NEW Analogue Click Clock designed by Gingko has a ultra-stylish and contemporary look. The cutting edge and aesthetical design makes it stand out from any traditional or digital analogue clock crowd and it certainly catches people's attention no matter where you put it, in your sitting room, office, kitchen or lounge .

The Analogue Click Clock can be placed on the table/shelf, or it can also be wall mounted. It meets people's desire for adding an unusual and aesthetically pleasing objet d'art in their living or working space, as well as telling the time in a very inspiring way.

Plus, the second dot moves every second on the circle face and looks like it's magically dancing on this beautiful piece of design, which makes it even more inspiring and appealing.

The Analogue Click Clock still features an alarm and sound activated functions, the same as our other click clocks. It can also be set to display permanently.
