

ABOUT US

Founded in 1998, Black+Blum is based in London - one of the most diverse and creative cities in the world with a thriving community of design-orientated companies. Our products are sold through a wide variety of retailers in over 60 countries worldwide and we have warehouse centres in the UK and the USA.

Following successes in various product categories, our focus is now firmly on further developing our fast-growing and internationally popular food & drink on-the-go range. This sector is benefitting from growing consumer trends, notably in the areas of health, wellness, and especially ecological awareness.

We are proud to have membership with:

“We want people who own Black+Blum products to feel great about using them every day.”

Dan Black - Co-founder & Lead Designer

OUR PLEDGE TO THE PLANET

Black+Blum are proud members of 1% for the Planet. This commits us to giving 1% of our total annual sales revenue to non-profit environmental charities. We are also pleased to be working with Climate Neutral, a non-profit organisation that is helping us work towards carbon neutrality by measuring, offsetting, and reducing our CO2 emissions.

Our products use energy to manufacture them, so we need to be 100% confident that they are built to last and really deserve to exist. We know that we can't solve the huge environmental issues facing the world by making more products, but we want our designs to help encourage people to live more sustainable lifestyles. By using a water bottle and lunch box regularly, you can greatly help reduce food waste (a huge contributing factor to world energy consumption) and also single-use food and drink packaging which is often never recycled. Through Climate Neutral, we will off-set our carbon footprint through our purchase of carbon credits, which invest in schemes like forestry projects. By the time one of our designs reaches the end-user, we will have offset the energy used to produce and ship it.

20+ YEARS OF DESIGN

FOOD & DRINK ON-THE-GO

People are increasingly realising the importance and benefits of sustainable, healthy living. Our unique, on-the-go designs offer a range of tailored solutions for all their hydration and nutritional needs. Taking your own food and drink with you brings many health, environmental and economical benefits.

NEW INSULATED & GLASS TRAVEL CUPS

NEW ACCESSORIES

STAINLESS STEEL COLLECTION

GLASS COLLECTION

CHARCOAL FILTER COLLECTION

NEW

Over the years, we have continually been asked to design a travel cup. Through extensive research, we found that people have different priorities in terms of what they look for in a cup design. We are now launching not one, but two designs. A vacuum insulated steel version to keep your drinks hot or cold and a glass one for taste connoisseurs. Both designs share a common top that is leakproof, easy to clean and is a pleasure to drink from. We have removed any excuse not to take your own cup with you.

D7 x H16.5 cm | D2.7 x H6.5 in
340 ml | 12 fl oz

INSULATED TRAVEL CUP

The perfect on-the-go cup for taking your coffee and tea with you, or cut down on disposable single-use cups, by handing it over to be filled by your favourite barista. It will keep your drinks hot for 5 hours and is a pleasure to drink from. The top is 100% leakproof, lockable and easy to disassemble to clean. This is a no-nonsense, built-to-last, designed to function travel cup that will last you a lifetime.

304/18-8 Stainless steel, silicone, polypropylene, nylon, POK, POM

GLASS TRAVEL CUP

Crafted from lightweight Borosilicate glass, this design will give you a completely taste neutral experience for either your favourite home brew or coffee shop roast, and help you avoid using disposable single-use cups. The non-slip insulating silicone sleeve gives protection to the surprisingly tough glass inner. The top is 100% leakproof, lockable and easy to disassemble to clean.

GLASS COLLECTION

QUALITY GLASS

More and more people are appreciating the benefits of drinking and eating from pure glass. Our innovative food storage designs come in different sizes to cater for all culinary creations, and the bottles come in a variety of colours to suit people's tastes.

GLASS LUNCH BOWL

At 750ml, the Glass Lunch Bowl is perfect for leafy salads, a hearty curry or even giant ravioli.

D14.5 x H8 cm | D5.7 x H3.2 in
750 ml | 25 fl oz

GLASS LUNCH POT - LARGE

The larger of the pots holds a sizeable lunch portion, without taking up too much space in your bag.

D12 x H9.5 cm | D4.7 x H3.7 in
600 ml | 20 fl oz

GLASS LUNCH POT

As the smallest of the range, the Lunch Pot is ideal for breakfasts, sides and snacks.

D9.5 x H11 cm | D3.7 x H4.3 in
450 ml | 15 fl oz

Our leakproof and lightweight glass lunch range comes in three sizes and two colours, Almond or Slate. The silicone lid prevents splattering when microwaving and the base container is made from durable polypropylene combined with sustainably-sourced wood fibre which provides protection for the glass bowl and makes it easy to hold after microwaving. The stainless-steel lid screws onto the base to provide a leak-proof seal.

GLASS WATER BOTTLE

Our glass water bottles have been designed to provide an enjoyable drinking experience. The thread is on the inside of the bottle neck giving you a smooth surface to drink from and the lid features high-quality stainless steel inside and out so that your water has no contact with any plastic. The bottles have a protective non-slip silicone sleeve and a convenient carry loop. Our "Almond" coloured sleeve is made of a combination of wood fibre and TPE for a unique finish.

STAINLESS STEEL COLLECTION

DURABLE STEEL

Our stainless steel range continues to receive an amazing reaction, and is collecting accolades from people who advocate a zero-waste lifestyle and appreciate products that are built to last. The mantra of 'buy once, buy well' is what fuels this collection and inspires us to grow and refine it every year.

STAINLESS STEEL LUNCH BOX LARGE

Our Stainless Steel Lunch Box is the first truly leak-proof box with 3-in-1 multi-functionality, meaning you can transport your lunch, cook dishes in the oven, and even store pre-cooked meals in a freezer. The silicone valve creates a secure vacuum-sealed closure, the adjustable divider allows you to separate food, and the fork and strap are added for convenience.

STAINLESS STEEL LUNCH BOX

Following on from the success of our large steel lunch box, we added a smaller version. Like the large, it has a silicone valve that makes it fully leak-proof, it can also be used in the oven and is freezer safe. The over-moulded silicone seal is designed for longer life and easy cleaning, and the silicone strap gives added security and also holds the included fork.

ORIGINALS COLLECTION

ORIGINS

In the past, children had fun lunch boxes and adults had to make do with boring containers. In 2010, we thought it was time to revolutionise the lunch box world. Products in the original collection had been best sellers for 9 years, and to celebrate their 10th anniversary in 2020, we updated them to be even better, whilst remaining true to their original appeal. This collection represents the classic designs that started the journey for us.

LUNCH BOX ORIGINAL

Designed to look like a ceramic bowl, the Lunch Box Original includes an inner container as well as a leak-proof sauce pot with a garnish area in the lid, and a stainless-steel fork. Being microwaveable and fully leak-proof, this is one of the most versatile lunch box solutions in our collection.

LUNCH POT ORIGINAL

The Lunch Pot Original consists of two leakproof pots that can be locked together for carrying. The pots have a convenient silicone carrying strap which also holds the stainless steel "spork" (spoon and fork). Separate anything from yoghurt and fruit to noodles and soup. When you're finished, the smaller pot fits inside the larger pot for easy storage.

CHARCOAL FILTER COLLECTION

100% NATURAL FILTRATION

The extraordinary filtering power of Binchotan charcoal has inspired perhaps our most iconic collection to date. What started out as one water filter bottle has developed into a series of must-have filtration products, whether you prefer to drink your water at home, at work or on-the-go.

BINCHOTAN CHARCOAL

HISTORY

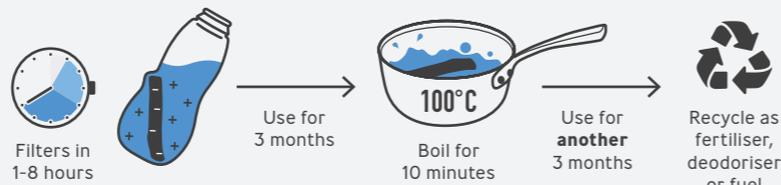

It is believed that a form of Binchotan charcoal (sometimes referred to as 'white charcoal') was introduced to Japan by a monk and scholar called Kukai 1,200 years ago. It was during the Edo Period (17th century) that a man called Binchuya Chozaemon made it popular.

HOW IT'S MADE

With conservation at the forefront of everything we do, we decided to source our charcoal from the skilled artisan makers of Laos because they follow strict conservation rules to protect the surrounding forests. The fast-growing native trees are pruned and the wood is transported to the kiln. It is stored there for 1 month untouched to dry the wood. It is then put inside the kiln and burned until it reaches 1200°C to make it red-hot and carbonised. The Binchotan charcoal is removed and quickly covered with a powder made from earth, sand & ash, and this gives the charcoal surface a whitish hue (explaining the name 'white charcoal'). The rapid rise in temperature, followed by a quick cooling, incinerates the bark and leaves a smooth, hard surface. This process takes 21 days.

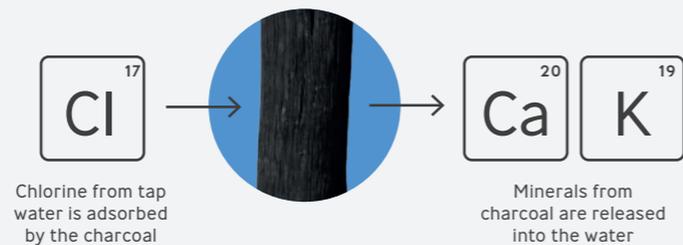

HOW TO USE

The best thing about Binchotan Charcoal (other than its amazing filtering ability) is that it lasts 6 months. All you have to do is make sure you recharge it by boiling it for 10 minutes after 3 months of use.

HOW IT WORKS

This type of filtering works using a process similar to a reverse osmosis system. Binchotan charcoal has an incredibly porous surface with tiny cavities orientated in many directions - just 1 gram has a surface area in excess of 500m² (the size of a tennis court). The positive ions of contaminants in the water (e.g. chlorine) are attracted to the negative surface of the carbon where they are held. In reverse, the charcoal releases its natural minerals such as calcium, potassium and magnesium back into the water, which softens it and enhances its taste.

CHARCOAL WATER FILTER

Binchotan charcoal makes tap water taste great! Leave in your water for 1-8 hours and you'll be amazed how well it works. Each stick lasts 6 months and comes vacuum packed in recyclable plastic for immediate use. Counter POS available (see p38).

(approx.) D2.5 x L11.8 cm | D1 x L5 in

EGS001-1B

CHARCOAL WATER FILTER & COIL

The charcoal water filter that you know and love has been upgraded! This stainless steel holder gives you the opportunity to keep your water filtered in any bottle, with no rattle and no scratches! It's also taste neutral and easy to use. Counter POS available (see p38).

EGS001-1C

CHARCOAL WATER FILTER 4-PACK

The charcoal 4-pack is exactly what it says on the box - a pack of four Binchotan charcoal sticks. Combined, the 4-pack gives you 2 years' worth of filtration! Each filter is individually vacuum-packed in recyclable plastic for immediate use.

W9.5 x L16.5 x H7 cm | W3.8 x L6.5 x H2.8 in

EGS004

NEW

LOOSE CHARCOAL

Up until now we have only sold our Binchotan charcoal as sticks of set lengths of 12cms. There is a growing demand by consumers to use 'loose' charcoal pieces instead of sticks in a variety of water containers, and also for other uses such as odour reduction. By launching these two options (one in a handy 250g pack for the end user, and the other in a 5kg bulk pack for retailers to sell by weight) we are able to utilise the off-cuts that are a by-product of the fixed length charcoal that we already sell.

NEW

CHARCOAL WATER FILTER PIECES - 250G

The pack contains 250g and we recommend using 50g per 1 litre serving. As with our charcoal sticks, the pieces last for 6 months provided you re-boil them for 10 minutes after 3 months' usage. The charcoal also has so many secondary uses, such as extending the life of your fruit or vegetables, absorbing unwanted odours or adding nutrients to plants.

W6 x L10 x H20 cm
W2.3 x L3.9 x H7.9 in

EGS250

NEW

CHARCOAL WATER FILTER PIECES - 5KG

This 5kg bulk pack of loose charcoal pieces is ideal for the retailer that wants to sell charcoal by weight. The shelf-ready box invites consumers to select the amount that suits them in the same way as more and more people are now doing in bulk food and zero-waste stores.
