Bioplastic C-PLA

Let's discover the world of green alternatives.

Bioplastic is made from renewable resources, like corn, sugar cane and grain. The sugar from these plants is fermented and distilled which creates lactic acid. By adding Talcum powder to the lactic acid it starts to crystallize. This creates a PLA that is more resistant to heat, namely C-PLA.

C-PLA bioplastic products are suitable for daily use, quick microwave heat-up and are dishwasher safe. The products are food grade and without artificial additives like BPA and melamine.

- **from renewable resources**
- **durable**
- **dishwasher safe (eco/50°C)**
- **short microwave heat up**
- **no BPA and no melamine**
- **plant based plastic**

Time-Out Mug -medium
